Shares of the Fund are primarily listed on CBOE BZX Exchange, Inc.

# GOOSE HOLLOW MULTI-STRATEGY INCOME ETF

(a series of the Collaborative Investment Series Trust)

## **Supplement dated November 21, 2025 to the Prospectus, Statement of Additional Information (“SAI”) and Summary Prospectus dated July 24, 2025, as supplemented**

---

The Board of Trustees (the “Board”) of Collaborative Investment Series Trust (the “Trust”) has determined that it is in the best interests of shareholders to liquidate the Goose Hollow Multi-Strategy Income ETF (the “Fund”), a series of the Trust, following a recommendation by the Fund’s investment adviser, Goose Hollow Capital Management LLC. The Board has determined to liquidate the Fund with the liquidation payment to shareholders expected to take place on or about November 28, 2025 (“Liquidation Date”).

The last day of trading in the Fund on the Cboe BZX Exchange, Inc. (the “Exchange”) will be November 25, 2025 (the “Closing Date”). Shareholders should be aware that while the Fund is preparing to liquidate, it will not be pursuing its stated investment objective or engaging in any business activities except for the purposes of winding up its business and affairs, preserving the value of its assets, paying its liabilities, and distributing its remaining assets to shareholders.

Shareholders may sell their holdings of the Fund on the Exchange until market close on the Closing Date and may incur typical transaction fees from their broker-dealer. The Fund’s shares will no longer trade on the Exchange after market close on the Closing Date, and the shares will be subsequently delisted. Shareholders who do not sell their shares of the Fund before market close on the Closing Date will receive cash equal to the amount of the net asset value of their shares, which will include any capital gains and dividends, in the cash portion of their brokerage accounts, on or about the Liquidation Date.

Shareholders generally will recognize a capital gain or loss equal to the amount received for their shares over their adjusted basis in such shares. You may wish to consult your tax advisor about your particular situation.

If you have questions or need assistance, please contact your financial advisor directly or the Fund at 1-(866) 898-6447.

**You should read this Supplement in conjunction with the Prospectus, SAI and Summary Prospectus dated July 24, 2025, as supplemented, for the Fund, which provides information that you should know about the Fund before investing and should be retained for future references. The [Prospectus](#), [SAI](#) and [Summary Prospectus](#) have been filed with the Securities and Exchange Commission and are incorporated by reference. Copies of each can be obtained without charge by calling the Fund at 1-(866) 898-6447.**

## FUND SUMMARY: GOOSE HOLLOW MULTI-STRATEGY INCOME ETF

**Investment Objectives:** Goose Hollow Multi-Strategy Income ETF (the “Fund”) seeks to provide income.

**Fees and Expenses of the Fund:** This table describes the fees and expenses, excluding any brokerage fees, that you may pay if you buy, sell, and hold shares of the Fund. **You may pay other fees, such as brokerage commissions and other fees to financial intermediaries, which are not reflected in the tables and examples below.**

<b>Annual Fund Operating Expenses</b> <i>(expenses that you pay each year as a percentage of the value of your investment)</i>	
Management Fees	0.65%
Distribution and/or Service (12b-1) Fees	0.00%
Other Expenses	1.06%
Acquired Fund Fees and Expenses <sup>(1)</sup>	0.42%
Total Annual Fund Operating Expenses	2.13%
Fee Waiver and Reimbursement <sup>(2)</sup>	(0.71)%
Total Annual Fund Operating Expenses After Fee Waiver	1.42%

(1) Acquired Fund Fees and Expenses, which are estimated for the Fund’s current fiscal period, are the indirect costs of investing in other investment companies. The operating expenses in this fee table will not correlate to the expense ratio in the Fund’s financial highlights because the financial statements include only the direct operating expenses incurred by the Fund.

(2) The adviser has contractually agreed to reduce its fees and to reimburse expenses, at least through January 31, 2026 to ensure that Net Annual Fund Operating Expenses (exclusive of any (i) front-end or contingent deferred loads, (ii) brokerage fees and commissions, (iii) acquired fund fees and expenses, (iv) fees and expenses associated with instruments in other collective investment vehicles or derivative instruments (including for example options and swap fees and expenses); (v) borrowing costs (such as interest and dividend expense on securities sold short), (vi) taxes, (vii) other fees related to underlying investments, (such as option fees and expenses or swap fees and expenses); or (viii) extraordinary expenses such as litigation (which may include indemnification of Fund officers and trustees or contractual indemnification of Fund service providers (other than the adviser)) will not exceed 1.00%. Fee waivers and expense reimbursements are subject to possible recoupment from the Fund in future years on a rolling three-year basis (within the three years after the fees have been waived or reimbursed) if such recoupment can be achieved within the foregoing expense limits or the expense limits in place at the time of recoupment. Fee waiver and reimbursement arrangements can decrease the Fund’s expenses and boost its performance. This expense limitation agreement may be terminated at any time, by the Board of Trustees upon sixty days’ written notice to the adviser.

**Example:** This Example is intended to help you compare the cost of investing in the Fund with the cost of investing in other funds.

The Example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your shares at the end of those periods. The Example also assumes that your investment has a 5% return each year and that the Fund’s operating expenses remain the same. The Example further assumes that the Fund’s operating expense limitation agreement will only be in place for the term specified above. Although your actual costs may be higher or lower, based upon these assumptions your costs would be:

<u>1 Year</u>	<u>3 Years</u>	<u>5 Years</u>	<u>10 years</u>
\$145	\$360	\$593	\$1,263

**PORTFOLIO TURNOVER:** The Fund pays transaction costs, such as commissions, when it buys and sells securities (or "turns over" its portfolio). A higher portfolio turnover rate may indicate higher transaction costs and may result in higher taxes when Fund shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the Example, may adversely affect the Fund's performance. For the fiscal period ended September 30, 2024, the Fund had a portfolio turnover of 35%.

#### **PRINCIPAL INVESTMENT STRATEGIES:**

The Fund is an actively managed exchange traded fund ("ETF") that seeks to achieve its investment objective by investing in a combination of fixed income ETFs and closed-end funds ("Underlying Funds"). The Underlying Funds in which the Fund invests each primarily invest in (1) corporate bonds of U.S. and foreign issuers, (2) U.S. and foreign government securities, and (3) agency and mortgage-backed securities. Underlying Funds may invest in non-investment grade fixed income securities, commonly known as "high yield" or "junk" bonds that are rated below Baa3 by Moody's Investors Service or similarly by another rating agency. The Fund may also invest directly in corporate bonds of U.S. and foreign issuers, preferred securities, U.S. and foreign government securities, and agency and mortgage-backed securities of any credit quality or maturity, including high yield or "junk" bonds. The Fund, under normal circumstances, will invest at least 80% of its net assets, plus any amounts of borrowing, in fixed income Underlying Funds and fixed-income securities.

The Fund may hedge duration and interest rate risk by investing up to 20% of its portfolio in futures contracts on U.S. and foreign sovereign bonds or fixed-income indexes. The Fund may purchase options on futures contracts and Underlying Funds. Duration is a measure of the expected life of a fixed income security that is used to determine the sensitivity of a security's price to changes in interest rates. The fund with a longer average portfolio duration will be more sensitive to increases in interest rates than the fund with a shorter average portfolio duration. For example, the price of a bond fund with an average duration of eight years would generally be expected to fall approximately 8% if interest rates rose by one percentage point.

The adviser utilizes rules-based, quantitative systems combined with discretionary analysis to measure market risk and select Underlying Funds to buy and sell for the Fund. The adviser adjusts the Fund's fixed income market exposure based upon robust analysis which is supported by proprietary models as necessary. These models may utilize factors including, but not limited to, momentum and trend (e.g., price return), market structure (e.g., liquidity), volatility, cross-asset signals (e.g., correlation), seasonality, and fundamentals (e.g., interest burden, debt sustainability).

In pursuing the Fund's investment objective, the adviser may engage in frequent trading of the Fund's portfolio securities, resulting in a high portfolio turnover rate.

**PRINCIPAL RISKS:** As with all ETFs, there is the risk that you could lose money through your investment in the Fund. Many factors affect the Fund's net asset value and performance.

*Asset-Backed and Mortgage-Backed Securities Risk:* When the Fund invests in asset-backed securities and mortgage-backed securities, the Fund is subject to the risk that, if the underlying borrowers fail to pay interest or repay principal, the assets backing these securities may not be sufficient to support payments on the securities.

*Closed-End Fund Risk:* Closed-end funds involve investment risks different from those associated with other investment companies. Shares of closed-end funds frequently trade at either a premium or discount relative to their net asset value ("NAV"). When the Fund purchases shares of a closed-end fund at a discount to its NAV, there can be no assurance that the discount will decrease. In fact, it is possible that this market discount may increase, and the Fund may suffer realized or unrealized capital losses due to further decline in the market price of the securities of such closed-end funds, thereby adversely affecting the NAV of the Fund's shares. Similarly, there can be no assurance that any shares of a closed-end fund purchased by the Fund at a premium will continue to trade at a premium or that the premium will not decrease subsequent to a purchase of such shares by the Fund. Many closed-end funds also utilize leverage, which will expose the Fund to greater risk of significant changes in share prices of the closed-end funds' share prices and will require payment of leverage interest or dividend expenses, reducing the closed-end fund's overall return. Closed-end funds also expose the Fund to illiquidity risks because closed-end funds may have smaller market capitalizations than other exchange-traded investments. Closed-end funds that pay a dividend or distribution may reduce or eliminate such payments from time to time.

*ETF Structure Risk:* The Fund is structured as an ETF and as a result is subject to the special risks, including:

- The market prices of Shares will fluctuate in response to changes in NAV and supply and demand for Shares and will include a "bid-ask spread" charged by the exchange specialists, market makers or other participants that trade the particular security. There may be times when the market price and the NAV vary significantly. This means that Shares may trade at a discount to NAV.
- In times of market stress, market makers may step away from their role market making in shares of ETFs and in executing trades, which can lead to differences between the market value of Fund shares and the Fund's net asset value.
- In stressed market conditions, the market for the Fund's shares may become less liquid in response to the deteriorating liquidity of the Fund's portfolio. This adverse effect on the liquidity of the Fund's shares may, in turn, lead to differences between the market value of the Fund's shares and the Fund's net asset value.

*Fixed Income Securities Risk:* When the Fund invests in fixed income securities, the value of your investment in the Fund will fluctuate with changes in interest rates. Typically, a rise in interest rates causes a decline in the value of fixed income securities owned by the Fund. In general, the market price of fixed income securities with longer maturities will increase or decrease more in response to changes in interest rates than shorter-term securities. Other risk factors include credit risk (the debtor may default), extension risk (an issuer may exercise its right to repay principal on a fixed rate obligation held by the Fund later than expected), and prepayment risk (the debtor may pay its obligation early, reducing the amount of interest payments). These risks could

affect the value of a particular investment by the Fund, possibly causing the Fund's share price and total return to be reduced and fluctuate more than other types of investments.

*Foreign Securities Risk:* Changes in foreign economies and political climates are more likely to affect the Fund than a fund that invests exclusively in U.S. companies. Foreign companies are generally not subject to the same regulatory requirements of U.S. companies thereby resulting in less publicly available information about these companies. In addition, foreign accounting, auditing and financial reporting standards generally differ from those applicable to U.S. companies.

*Futures Risk:* The Fund's use of futures involves risks different from, or possibly greater than, the risks associated with investing directly in securities and other traditional investments. These risks include (i) leverage risk (ii) risk of mispricing or improper valuation; and (iii) the risk that changes in the value of the futures contract may not correlate perfectly with the underlying index. Investments in futures involve leverage, which means a small percentage of assets invested in futures can have a disproportionately large impact on the Fund. This risk could cause the Fund to lose more than the principal amount invested. Futures contracts may become mispriced or improperly valued when compared to the Adviser's expectation and may not produce the desired investment results. Additionally, changes in the value of futures contracts may not track or correlate perfectly with the underlying index because of temporary, or even long-term, supply and demand imbalances and because futures do not pay dividends unlike the stocks upon which they are based.

*Hedging Risk:* If the Fund uses a hedging instrument at the wrong time or judges the market conditions incorrectly, the hedge might be unsuccessful, reduce the Fund's investment return, or create a loss.

*High Yield Bond Risk:* Lower-quality bonds, known as "high yield" or "junk" bonds, present greater risk than bonds of higher quality, including an increased risk of default. An economic downturn or period of rising interest rates could adversely affect the market for these bonds and reduce the Fund's ability to sell its bonds. The lack of a liquid market for these bonds could decrease the Fund's share price.

*Management Risk:* The adviser's assessment of the attractiveness and potential appreciation of particular investments or markets in which the Fund invests may prove to be incorrect and there is no guarantee that adviser's investment strategy will produce the desired results, causing losses for the Fund.

*Market and Geopolitical Risk:* The increasing interconnectivity between global economies and financial markets increases the likelihood that events or conditions in one region or financial market may adversely impact issuers in a different country, region or financial market. Securities in the Fund's portfolio may underperform due to inflation (or expectations for inflation), interest rates, global demand for particular products or resources, natural disasters, climate change or climate-related events, pandemics, epidemics, terrorism, international conflicts, regulatory events and governmental or quasi-governmental actions. The occurrence of global events similar to those in recent years, such as terrorist attacks around the world, natural disasters, social and political discord or debt crises and downgrades, among others, may result in market volatility and may have long term effects on both the U.S. and global financial markets. It is difficult to

predict when similar events affecting the U.S. or global financial markets may occur, the effects that such events may have and the duration of those effects.

*Portfolio Turnover Risk:* A higher portfolio turnover will result in higher transactional and brokerage costs. Such transactional and brokerage costs have a negative effect on Fund performance. Frequent trading may result in the Fund realizing more short-term capital gains than other funds.

*Options Risk:* There are risks associated with the sale and purchase of call and put options. As a seller (writer) of a put option, the Fund will tend to lose money if the value of the reference index or security falls below the strike price. As the seller (writer) of a call option, the Fund will tend to lose money if the value of the reference index or security rises above the strike price. As the buyer of a put or call option, the Fund risks losing the entire premium invested in the option if the Fund does not exercise the option.

*Preferred Stock Risk:* The value of preferred stocks will fluctuate with changes in interest rates. Typically, a rise in interest rates causes a decline in the value of preferred stock. Preferred stocks are also subject to credit risk, which is the possibility that an issuer of preferred stock will fail to make its dividend payments.

*Sovereign Bond Futures Risk:* Sovereign bond futures contracts provide for the delivery upon maturity of one Sovereign Bond among a basket of eligible-to-deliver Sovereign Bonds. The price, yield and modified duration of each eligible-to-deliver Sovereign bond under the relevant sovereign bond futures contract, and which sovereign bond is cheapest to deliver, may change unpredictably, affecting the value of the relevant sovereign bond futures contract and, consequently, the value of your shares in unforeseeable ways.

**Performance:** The performance table below shows the variability of the Fund's returns over time, which is some indication of the risks of investing in the Fund. The bar chart shows performance of the Fund's shares for each full calendar year since the Fund's inception. The performance table compares the performance of the Fund's shares over time to the performance of a broad-based market index. You should be aware that the Fund's past performance (before and after taxes) may not be an indication of how the Fund will perform in the future. Updated performance information is available at no cost by calling (866) 898-6447 and is also available at <https://ghms.gham.co>.

### **Performance Bar Chart**

Best quarter: 9/30/2024 4.78%  
Worst quarter: 12/31/2024 -2.86%

**Performance Table**  
**Average Annual Total Returns**  
**(For periods ended December 31, 2024)**

	One Year	Since Inception (since 11/14/23)
Return Before Taxes	2.43%	5.34%
Return After Taxes on Distributions	0.62%	3.59%
Return After Taxes on Distributions and Sale of Fund Shares	1.44%	3.35%
Bloomberg U.S. Aggregate Bond Index <sup>(1)</sup>	1.25%	6.78%

(1) The Bloomberg U.S. Aggregate Bond Index is a broad-based flagship benchmark that measures the investment grade, US dollar-denominated, fixed-rate taxable bond market. The index includes Treasuries, government-related and corporate securities, fixed rate agency MBS, ABS and CMBS (agency and non-agency). Index returns, unlike the Fund's returns, do not reflect any fees or expenses. Investors cannot invest directly in an index.

**Adviser:** Goose Hollow Capital Management LLC (the "Adviser").

**Portfolio Manager:** Krishna Kumar has served as the Fund's portfolio manager since the Fund's inception in November, 2023.

**Purchase and Sale of Fund Shares:** The Fund will issue and redeem Shares at NAV per Share only in large blocks of 25,000 Shares (each block of Shares is called a "Creation Unit"). Creation Units are issued and redeemed for cash and/or in-kind for securities. Individual Shares may only be purchased and sold in secondary market transactions through brokers. Except when aggregated in Creation Units, the Shares are not redeemable securities of the Fund.

Shares of the Fund are listed for trading on CBOE BZX Exchange, Inc. (the “Exchange”) and trade at market prices rather than NAV. Shares of the Fund may trade at a price that is greater than, at, or less than NAV.

**Tax Information:** Dividends and capital gain distributions you receive from the Fund, whether you reinvest your distributions in additional Fund shares or receive them in cash, are taxable to you at either ordinary income or capital gains tax rates unless you are investing through a tax-free plan. If you are investing through a tax free plan, you will be taxed upon withdrawal from your account.

**Payments to Broker-Dealers and Other Financial Intermediaries:** If you purchase the Fund through a broker-dealer or other financial intermediary (such as a bank), the Fund and its related companies may pay the intermediary for the sale of Fund shares and related services. These payments may create a conflict of interest by influencing the broker-dealer or other intermediary and your salesperson to recommend the Fund over another investment. Ask your salesperson or visit your financial intermediary's website for more information.

## **ADDITIONAL INFORMATION ABOUT PRINCIPAL INVESTMENT STRATEGIES AND RELATED RISKS**

### **INVESTMENT OBJECTIVES**

<b>FUND</b>	<b>INVESTMENT OBJECTIVE</b>
Goose Hollow Multi-Strategy Income ETF	The Fund seeks to provide income.

The Collaborative Investment Series Trust Board of Trustees (the “Board”) may change the Fund’s investment objective upon 60 days’ written notice to shareholders.

### **PRINCIPAL INVESTMENT STRATEGIES**

The Fund is an actively managed exchange traded fund (“ETF”) that seeks to achieve its investment objective by investing in a combination of fixed income ETFs and closed-end funds (“Underlying Funds”). The Underlying Funds in which the Fund invests each primarily invest in (1) corporate bonds of U.S. and foreign issuers, (2) U.S. and foreign government securities, and (3) agency and mortgage-backed securities. Underlying Funds may invest in non-investment grade fixed income securities, commonly known as “high yield” or “junk” bonds that are rated below Baa3 by Moody’s Investors Service or similarly by another rating agency. The Fund may also invest directly in corporate bonds of U.S. and foreign issuers, preferred securities, U.S. and foreign government securities, and agency and mortgage-backed securities of any credit quality or maturity, including high yield or “junk” bonds.

The Fund may hedge duration and interest rate risk by investing up to 20% of its portfolio in futures contracts on U.S. and foreign sovereign bonds or fixed- income indexes. The Fund may purchase options on futures contracts and Underlying Funds.

The Adviser utilizes rules-based, quantitative systems combined with discretionary analysis to measure market risk and select Underlying Funds to buy and sell for the Fund. The Adviser adjusts the Fund’s fixed income market exposure based upon robust analysis which is supported by proprietary models as necessary. These models may utilize factors including, but not limited to, momentum and trend (e.g., price return), market structure (e.g., liquidity), volatility, cross-asset signals (e.g., correlation), seasonality, and fundamentals (e.g., interest burden, debt sustainability fixed income).

In pursuing the Fund’s investment objective, the Adviser may engage in frequent trading of the Fund’s portfolio securities, resulting in a high portfolio turnover rate.

### **PRINCIPAL INVESTMENT RISKS**

There is no assurance that the Fund will achieve its investment objective. The Fund’s share price will fluctuate with changes in the market value of its portfolio securities. When you sell your Fund shares, they may be worth less than what you paid for them and, accordingly, you can lose money investing in the Fund. The following risks could adversely affect the net asset value, total return and the value of the Fund and your investment. The risk descriptions below provide a more detailed explanation of the principal investment risks that correspond to the risks described in the Fund’s Summary section of this Prospectus.

*Asset-Backed and Mortgage-Backed Securities Risk:* Prepayment risk is associated with mortgage-backed and asset-backed securities. If interest rates fall, the underlying debt may be repaid ahead of schedule, reducing the value of the Fund's investments. If interest rates rise, there may be fewer prepayments, which would cause the average bond maturity to rise, increasing the potential for the Fund to lose money. The value of these securities may be significantly affected by changes in interest rates, the market's perception of issuers, and the creditworthiness of the parties involved. The ability of the Fund to successfully utilize these instruments may depend on the ability of the Fund's Adviser to forecast interest rates and other economic factors correctly. These securities may have a structure that makes their reaction to interest rate changes and other factors difficult to predict, making their value highly volatile. Certain mortgage-backed securities may be secured by pools of mortgages on single-family, multi-family properties, as well as commercial properties. Similarly, asset backed securities may be secured by pools of loans, such as student loans, automobile loans and credit card receivables. The credit risk on such securities is affected by homeowners or borrowers defaulting on their loans. The values of assets underlying mortgage-backed and asset-backed securities may decline and, therefore, may not be adequate to cover underlying investors. Mortgage-backed securities and other securities issued by participants in housing and commercial real estate finance, as well as other real estate-related markets have experienced extraordinary weakness and volatility in recent years. Possible legislation in the area of residential mortgages, credit cards and other loans that may collateralize the securities in which the Fund may invest could negatively impact the value of the Fund's investments. To the extent the Fund focuses its investments in particular types of mortgage-backed or asset-backed securities, the Fund may be more susceptible to risk factors affecting such types of securities.

*Closed-End Fund Risk:* Closed-end funds involve investment risks different from those associated with other investment companies. Shares of closed-end funds frequently trade at either a premium or discount relative to their NAV. When the Fund purchases shares of a closed-end fund at a discount to its NAV, there can be no assurance that the discount will decrease. In fact, it is possible that this market discount may increase, and the Fund may suffer realized or unrealized capital losses due to further decline in the market price of the securities of such closed-end funds, thereby adversely affecting the NAV of the Fund's shares. Similarly, there can be no assurance that any shares of a closed-end fund purchased by the Fund at a premium will continue to trade at a premium or that the premium will not decrease subsequent to a purchase of such shares by the Fund. Many closed-end funds also utilize leverage, which will expose the Fund to greater risk of significant changes in share prices of the closed-end funds' share prices and will require payment of leverage interest or dividend expenses, reducing the closed-end fund's overall return. Closed-end funds also expose the Fund to illiquidity risks because closed-end funds may have smaller market capitalizations than other exchange-traded investments. Closed-end funds that pay a dividend or distribution may reduce or eliminate such payments from time to time.

*ETF Structure Risk:* The Fund is structured as an ETF and as a result is subject to the special risks, including:

- The market prices of Shares will fluctuate in response to changes in NAV and supply and demand for Shares and will include a "bid-ask spread" charged by the exchange specialists, market makers or other participants that trade the

particular security. There may be times when the market price and the NAV vary significantly. This means that Shares may trade at a discount to NAV.

- In times of market stress, market makers may step away from their role market making in shares of ETFs and in executing trades, which can lead to differences between the market value of Fund shares and the Fund's net asset value.
- In stressed market conditions, the market for the Fund's shares may become less liquid in response to the deteriorating liquidity of the Fund's portfolio. This adverse effect on the liquidity of the Fund's shares may, in turn, lead to differences between the market value of the Fund's shares and the Fund's net asset value.

*Fixed Income Securities Risk:* Fixed income risk factors include credit risk (the debtor may default) and prepayment risk (the debtor may pay its obligation early or later than expected, potentially reducing the amount of interest payments or extending time to principal repayment). These risks could affect the value of a particular investment possibly causing the Fund's share price and total return to be reduced and fluctuate more than other types of investments. When the Fund invests in fixed income securities the value of your investment in the Fund will fluctuate with changes in interest rates. Typically, a rise in interest rates causes a decline in the value of fixed income securities. In general, the market price of debt securities with longer maturities will increase or decrease more in response to changes in interest rates than shorter-term securities. If the U.S. Federal Reserve's Federal Open Market Committee ("FOMC") raises the federal funds interest rate target, interest rates across the U.S. financial system may rise. However, the magnitude of rate changes across maturities and borrower sectors is uncertain. Rising rates may decrease liquidity and increase volatility, which may make portfolio management more difficult and costly to the Fund and its shareholders. Additionally, default risk increases if issuers must borrow at higher rates. Generally, these changing market conditions may cause the Fund's share price to fluctuate or decline more than other types of equity investments.

*Foreign Securities Risk:* Changes in foreign economies and political climates are more likely to affect the Fund than a mutual fund that invests exclusively in U.S. companies. There may also be less government supervision of foreign markets, resulting in non-uniform accounting practices and less publicly available information. The values of foreign investments may be affected by changes in exchange control regulations, application of foreign tax laws (including withholding tax), changes in governmental administration or economic or monetary policy (in this country or abroad) or changed circumstances in dealings between nations. In addition, foreign brokerage commissions, custody fees and other costs of investing in foreign securities are generally higher than in the United States. Investments in foreign companies, particularly in less developed markets, could be affected by other factors not present in the U.S., including expropriation, armed conflict, confiscatory taxation, and potential difficulties in enforcing contractual obligations. As a result, the Fund may be exposed to greater risk and will be more dependent on the Adviser's ability to assess such risk than if the Fund invested solely in the U.S. or more developed foreign markets.

*Futures Risk:* The Fund's use of futures involves risks different from, or possibly greater than, the risks associated with investing directly in securities and other traditional investments. These risks include (i) leverage risk (ii) risk of mispricing or improper

valuation; and (iii) the risk that changes in the value of the futures contract may not correlate perfectly with the underlying index. Investments in futures involve leverage, which means a small percentage of assets invested in futures can have a disproportionately large impact on the Fund. This risk could cause the Fund to lose more than the principal amount invested. Futures contracts may become mispriced or improperly valued when compared to the Adviser's expectation and may not produce the desired investment results. Additionally, changes in the value of futures contracts may not track or correlate perfectly with the underlying index because of temporary, or even long-term, supply and demand imbalances and because futures do not pay dividends unlike the stocks upon which they are based.

*Hedging Risk:* If the Fund uses a hedging instrument at the wrong time or judges the market conditions incorrectly, the hedge might be unsuccessful, reduce the Fund's investment return, or create a loss.

*High Yield Bond Risk:* Lower-quality bonds, known as "high yield" or "junk" bonds, present a significant risk for loss of principal and interest. These bonds offer the potential for higher return, but also involve greater risk than bonds of higher quality, including an increased possibility that the bond's issuer, obligor or guarantor may not be able to make its payments of interest and principal (credit quality risk). If that happens, the value of the bond may decrease, and the Fund's share price may decrease and its income distribution may be reduced. An economic downturn or period of rising interest rates (interest rate risk) could adversely affect the market for these bonds and reduce the Fund's ability to sell its bonds (liquidity risk). Such securities may also include "Rule 144A" securities, which are subject to resale restrictions. The lack of a liquid market for these bonds could decrease the Fund's share price.

*Management Risk:* The Adviser's assessment of the attractiveness and potential appreciation of particular investments or markets in which the Fund invests may prove to be incorrect and there is no guarantee that the Adviser's investment strategy will produce the desired results.

*Market and Geopolitical Risk:* The increasing interconnectivity between global economies and financial markets increases the likelihood that events or conditions in one region or financial market may adversely impact issuers in a different country, region or financial market. Securities in the Fund's portfolio may underperform due to inflation (or expectations for inflation), interest rates, global demand for particular products or resources, natural disasters, pandemics, epidemics, terrorism, international conflicts regulatory events and governmental or quasi-governmental actions. The occurrence of global events similar to those in recent years, such as terrorist attacks around the world, natural disasters, climate change and climate-related events, social and political discord or debt crises and downgrades, among others, may result in market volatility and may have long term effects on both the U.S. and global financial markets. It is difficult to predict when similar events affecting the U.S. or global financial markets may occur, the effects that such events may have and the duration of those effects. Any such event(s) could have a significant adverse impact on the value and risk profile of the Fund's portfolio. The coronavirus (COVID-19) global pandemic had negative impacts, and in many cases severe negative impacts, on markets worldwide. It is not known how long such impacts, or any future impacts of other significant events described above, will or would last, but there could be a prolonged period of global economic slowdown, which may impact your Fund investment. Therefore, the Fund could lose money over short

periods due to short-term market movements and over longer periods during more prolonged market downturns.

***Portfolio Turnover Risk:*** A higher portfolio turnover will result in higher transactional and brokerage costs. Such transactional and brokerage costs have a negative effect on Fund performance. Frequent trading may result in the Fund realizing more short-term capital gains than other funds.

***Preferred Stock Risk:*** The Fund may invest in preferred stocks. The value of preferred stocks will fluctuate with changes in interest rates. Typically, a rise in interest rates causes a decline in the value of preferred stock. Preferred stocks are also subject to credit risk, which is the possibility that an issuer of preferred stock will fail to make its dividend payments. Preferred stock prices tend to move more slowly upwards than common stock prices.

***Options Risk:*** The Fund may lose the entire put option premium paid if the underlying security does not decrease in value at expiration. Put options may not be an effective hedge because they may have imperfect correlation to the value of the Fund's portfolio securities. Purchased put options may decline in value due to changes in price of the underlying security, passage of time and changes in volatility. Written call and put options may limit the Fund's participation in equity market gains and may magnify the losses if the price of the written option instrument increases in value between the date when the Fund writes the option and the date on which the Fund purchases an offsetting position. The Fund will incur a loss as a result of a written options (also known as a short position) if the price of the written option instrument increases in value between the date when the Fund writes the option and the date on which the Fund purchases an offsetting position.

***Sovereign Bond Futures Risk:*** Sovereign bond futures contracts provide for the delivery upon maturity of one sovereign bond among a basket of eligible-to-deliver sovereign bonds. The price, yield and modified duration of each eligible-to-deliver sovereign bond under the relevant sovereign bond futures contract, and which sovereign bond is cheapest to deliver, may change unpredictably, affecting the value of the relevant sovereign bond futures contract and, consequently, the value of your shares in unforeseeable ways.

**Temporary Investments:** To respond to adverse market, economic, political or other conditions, the Fund may invest 100% of its total assets, without limitation, in high-quality short-term debt securities and money market instruments. These short-term debt securities and money market instruments include shares of money market mutual funds, commercial paper, certificates of deposit, bankers' acceptances, and U.S. Government securities. While the Fund is in a defensive position, the Fund may not achieve its investment objective. Furthermore, to the extent that a Fund invests in money market mutual funds for cash positions, there will be some duplication of expenses because the Fund pays its pro-rata portion of such money market funds' advisory fees and operational fees. The Fund may also invest a substantial portion of its assets in such instruments at any time to maintain liquidity or pending selection of investments in accordance with its policies.

**Portfolio Holdings Disclosure:** A description of the Fund’s policies and regarding the release of portfolio holdings information is available in the Fund’s Statement of Additional Information (“SAI”).

**Cybersecurity:** The computer systems, networks and devices used by the Fund and its service providers to carry out routine business operations employ a variety of protections designed to prevent damage or interruption from computer viruses, network failures, computer and telecommunication failures, infiltration by unauthorized persons and security breaches. Despite the various protections utilized by the Fund and its service providers, systems, networks, or devices potentially can be breached. The Fund and its shareholders could be negatively impacted as a result of a cybersecurity breach.

Cybersecurity breaches can include unauthorized access to systems, networks, or devices; infection from computer viruses or other malicious software code; and attacks that shut down, disable, slow, or otherwise disrupt operations, business processes, or website access or functionality. Cybersecurity breaches may cause disruptions and impact the Fund’s business operations, potentially resulting in financial losses; interference with the Fund’s ability to calculate its NAV; impediments to trading; the inability of the Fund, the Adviser, and other service providers to transact business; violations of applicable privacy and other laws; regulatory fines, penalties, reputational damage, reimbursement or other compensation costs, or additional compliance costs; as well as the inadvertent release of confidential information.

Similar adverse consequences could result from cybersecurity breaches affecting issuers of securities in which the Fund invests; counterparties with which the Fund engages in transactions; governmental and other regulatory authorities; exchange and other financial market operators, banks, brokers, dealers, insurance companies, and other financial institutions (including financial intermediaries and service providers for the Fund’s shareholders); and other parties. In addition, substantial costs may be incurred by these entities in order to prevent any cybersecurity breaches in the future.

## **MANAGEMENT OF THE FUND**

### **Investment Adviser**

Goose Hollow Capital Management LLC (the “Adviser”), located at 82 North Summit Street, Suite 2B Tenaflly, NJ 07670, serves as investment adviser to the Fund. Subject to the authority of the Board, the adviser is responsible for the overall management of the Fund’s business affairs. The Adviser is responsible for selecting the Fund’s investments according to the Fund’s investment objective, policies, and restrictions.

Pursuant to an investment advisory agreements between the Trust, on behalf of the Fund, and the Adviser (each an “Investment Advisory Agreement” and collectively, the “Investment Advisory Agreements”), the Fund pays the Adviser, on a monthly basis, an annual advisory fee of 0.65% of the Fund’s average daily net assets. A discussion regarding the basis of the Board’s approval of the Investment Advisory Agreement for the Fund is available in the Fund’s semi-annual shareholder report dated March 31, 2024. For the fiscal year ended September 30, 2024, the Fund paid the Adviser (net of fee waivers) 0% of the Fund’s average daily net assets.

The Adviser has contractually agreed to reduce its fees and to reimburse expenses, at least through January 31, 2026 to ensure that Net Annual Fund Operating Expenses (exclusive of any (i) front-end or contingent deferred loads, (ii) brokerage fees and commissions, (iii) acquired fund fees and expenses, (iv) fees and expenses associated with instruments in other collective investment vehicles or derivative instruments (including for example options and swap fees and expenses); (v) borrowing costs (such as interest and dividend expense on securities sold short), (vi) taxes, (vii) other fees related to underlying investments, (such as option fees and expenses or swap fees and expenses); or (viii) extraordinary expenses such as litigation (which may include indemnification of Fund officers and trustees or contractual indemnification of Fund service providers (other than the adviser)) will not exceed 1.00% for the Fund. This expense limitation agreement may be terminated at any time, by the Board upon sixty days written notice to the Adviser. The expense limitation agreement will automatically terminate if the Investment Advisory Agreements are terminated.

Fee waivers and expense reimbursements are subject to possible recoupment from the Fund in future years on a rolling three-year basis (within the three years after the fees have been waived or reimbursed) if such recoupment can be achieved within the foregoing expense limits or the expense limits in place at the time of recoupment. Fee waiver and reimbursement arrangements can decrease the Fund's expenses and boost its performance.

### **Portfolio Manager**

Krishna Kumar is responsible for the day-to-day management of the Fund. Prior to founding the Adviser, Mr. Kumar served as a derivatives trader with MKP Capital from 2016 to 2018. Mr. Kumar earned an undergraduate degree in mathematics from Sri Sathya Sai University in 1996 and a graduate degree in computational finance from Oregon Graduate Institute in 2002.

The Fund's SAI provides additional information about the portfolio manager's compensation structure, other accounts managed by the portfolio manager, and the portfolio manager's ownership of Fund shares.

### **NET ASSET VALUE**

The net asset value ("NAV") and offering price (NAV plus any applicable sales charges) of the Fund's shares is determined as of the close of the Exchange (normally 4:00 p.m. Eastern Time) on each day the Exchange is open for business (the "Valuation Time"). NAV is computed by determining, on a per class basis, the aggregate market value of all assets of the applicable Fund, less its liabilities, divided by the total number of shares outstanding ((assets-liabilities)/number of shares = NAV). The Exchange is closed on weekends and New Year's Day, Martin Luther King, Jr. Day, Presidents' Day, Good Friday, Memorial Day, Juneteenth National Independence Day, Independence Day, Labor Day, Thanksgiving Day and Christmas Day. The NAV takes into account, on a per class basis, the expenses and fees of the Fund, including management, administration, and distribution fees, which are accrued daily. The determination of NAV for the Fund for a particular day is applicable to all applications for the purchase of shares, as well as all requests for the redemption of shares, received by the Fund (or an authorized broker or agent, or its authorized designee) before the close of trading on the Exchange on that day.

The Fund's securities or other investment assets for which market quotations are readily available will be valued at current market value based upon such market quotations as of the Valuation Time. The Fund may use independent pricing agents to provide current market values. Generally, the Fund's securities are valued each day at the last quoted sales price on each security's primary exchange. Securities traded or dealt in upon one or more securities exchanges (whether domestic or foreign) for which market quotations are readily available and not subject to restrictions against resale shall be valued at the last quoted sales price on the primary exchange or, in the absence of a sale on the primary exchange, at the mean between the current bid and ask prices on such exchange. If market quotations are not readily available, securities will be valued at their fair market value as determined in good faith and evaluated as to the reliability of the fair value method used by the Board on a quarterly basis, in accordance with procedures approved by the Board. Securities primarily traded in the National Association of Securities Dealers' Automated Quotation System ("NASDAQ") National Market System for which market quotations are readily available shall be valued using the NASDAQ Official Closing Price. If market quotations are not readily available, securities will be valued at their fair market value as determined using the "fair value" procedures approved by the Board. Fair value pricing involves subjective judgments and it is possible that the fair value determined for a security may be materially different than the value that could be realized upon the sale of that security. The fair value prices can differ from market prices when they become available or when a price becomes available. The Board has delegated execution of these procedures to the Adviser as the "Valuation Designee". The Adviser may also enlist third party consultants such as an audit firm or financial officer of a security issuer on an as-needed basis to assist in determining a security-specific fair value. The Board reviews the execution of this process and the resultant fair value prices at least quarterly to assure the process produces reliable results.

The Fund may use independent pricing services to assist in calculating the value of the Fund's securities. In addition, market prices for foreign securities are not determined at the same time of day as the NAV for the Fund. The Fund may invest in foreign securities that are primarily listed on foreign exchanges that may trade on weekends or other days when the Fund does not price its shares, the value of the Fund's portfolio may change on days when you may not be able to buy or sell Fund shares. In computing the NAV, the Fund values foreign securities held by the Fund at the latest closing price on the exchange in which they are traded immediately prior to closing of the Exchange. Prices of foreign securities quoted in foreign currencies are translated into U.S. dollars at current rates. If events materially affecting the value of a security in the Fund's portfolio, particularly foreign securities, occur after the close of trading on a foreign market but before the Fund prices its shares, the securities will be valued at fair value. For example, if trading in a portfolio security is halted and does not resume before the Fund calculates its NAV, the Adviser may need to price the security using the Fund's fair value pricing guidelines. Without a fair value price, short-term traders could take advantage of the arbitrage opportunity and dilute the NAV of long-term investors. Fair valuation of the Fund's portfolio securities can serve to reduce arbitrage opportunities available to short-term traders, but there is no assurance that fair value pricing policies will prevent dilution of the Fund's NAV by short term traders. The determination of fair value involves subjective judgments. As a result, using fair value to price a security may result in a price materially different from the prices used by other mutual funds to determine net asset value or the price that may be realized upon the actual sale of the security.

With respect to any portion of the Fund's assets that are invested in one or more open-end management investment companies that are registered under the 1940 Act, the Fund's NAV is calculated based upon the net asset values of the registered open-end management investment companies in which the Fund invests, and the prospectuses for these companies explain the circumstances under which those companies will use fair value pricing and the effects of using fair value pricing.

### **Premium/Discount Information**

Most investors will buy and sell Shares of the Fund in secondary market transactions through brokers at market prices and the Fund's Shares will trade at market prices. The market price of Shares of the Fund may be greater than, equal to, or less than NAV. Market forces of supply and demand, economic conditions and other factors may affect the trading prices of Shares of the Fund.

Information regarding how often the Shares of the Fund traded at a price above (at a premium to) or below (at a discount to) the NAV of the Fund during the past four calendar quarters, when available, can be found at <https://ghms.gham.co/>.

### **HOW TO BUY AND SELL SHARES**

Shares of the Fund will be listed for trading on the Exchange under the symbol GHMS. Share prices are reported in dollars and cents per Share. Shares can be bought and sold on the secondary market throughout the trading day like other publicly traded shares, and Shares typically trade in blocks of less than a Creation Unit. There is no minimum investment required. Shares may only be purchased and sold on the secondary market when the Exchange is open for trading. The Exchange is open for trading Monday through Friday and is closed on weekends and the following holidays, as observed: New Year's Day, Martin Luther King, Jr. Day, Presidents' Day, Good Friday, Memorial Day, Juneteenth National Independence Day, Independence Day, Labor Day, Thanksgiving Day and Christmas Day.

When buying or selling Shares through a broker, you will incur customary brokerage commissions and charges, and you may pay some or all of the spread between the bid and the offered price in the secondary market on each leg of a round trip (purchase and sale) transaction.

Authorized Participants that have entered into contracts with the Fund's distributor may acquire Shares directly from the Fund, and Authorized Participants may tender their Shares for redemption directly to the Fund, at NAV per Share only in large blocks, or Creation Units, of 25,000 Shares. Purchases and redemptions directly with the Fund must follow the Fund's procedures, which are described in the SAI.

The Fund may liquidate and terminate at any time without shareholder approval.

### **Share Trading Prices**

The approximate value of Shares of the Fund, an amount representing on a per share basis the sum of the current market price of the securities accepted by the Fund in exchange for Shares of the Fund and an estimated cash component will be disseminated every 15 seconds throughout the trading day through the facilities of the Consolidated

Tape Association. This approximate value should not be viewed as a “real-time” update of the NAV per Share of the Fund because the approximate value may not take into account certain Fund expenses and may not be calculated in the same manner as the NAV, which is computed once a day, generally at the end of the business day. The Fund is not involved in, or responsible for, the calculation or dissemination of the approximate value of the Shares, and the Fund does not make any warranty as to the accuracy of these values.

## **Book Entry**

Shares are held in book entry form, which means that no stock certificates are issued. The Depository Trust Company (“DTC”) or its nominee is the record owner of all outstanding Shares of the Fund and is recognized as the owner of all Shares for all purposes.

Investors owning Shares are beneficial owners as shown on the records of DTC or its participants. DTC serves as the securities depository for all Shares. Participants in DTC include securities brokers and dealers, banks, trust companies, clearing corporations and other institutions that directly or indirectly maintain a custodial relationship with DTC. As a beneficial owner of Shares, you are not entitled to receive physical delivery of stock certificates or to have Shares registered in your name, and you are not considered a registered owner of Shares. Therefore, to exercise any right as an owner of Shares, you must rely upon the procedures of DTC and its participants. These procedures are the same as those that apply to any other securities that you hold in book entry or “street name” form.

## **FREQUENT PURCHASES AND REDEMPTIONS OF FUND SHARES**

The Fund’s Shares can only be purchased and redeemed directly from the Fund in Creation Units by Authorized Participants who have entered into agreements with the Fund’s distributor. The vast majority of trading in the Fund’s Shares occurs on the secondary market. Because the secondary market trades do not directly involve the Fund, it is unlikely those trades would cause the harmful effects of market timing, including dilution, disruption of portfolio management, increases in the Fund’s trading costs and the realization of capital gains. With regard to the purchase or redemption of Creation Units directly with the Fund, to the extent effected in-kind (*i.e.*, for securities), those trades do not cause the harmful effects that may result from frequent cash trades. To the extent trades are effected in whole or in part in cash, those trades could result in dilution to the Fund and increased transaction costs, which could negatively impact the Fund’s ability to achieve its investment objective. However, direct trading by Authorized Participants is critical to ensuring that the Fund’s Shares trade at or close to NAV. The Fund also employ fair valuation pricing to minimize potential dilution from market timing. In addition, the Fund impose transaction fees on purchases and redemptions of Fund Shares to cover the custodial and other costs incurred by the Fund in effecting trades. These fees increase if an investor substitutes cash in part or in whole for securities, reflecting the fact that the Fund’s trading costs increase in those circumstances. Given this structure, the Trust has determined that it is not necessary to adopt policies and procedures to detect and deter market timing of the Fund’s Shares.

## **DISTRIBUTION AND SERVICE PLAN**

The Fund has adopted a distribution and service plan (“Plan”) pursuant to Rule 12b-1 under the 1940 Act. Under the Plan, the Fund is authorized to pay distribution fees to the distributor and other firms that provide distribution and shareholder services (“Service Providers”). If a Service Provider provides these services, the Fund may pay fees at an annual rate not to exceed 0.25% of average daily net assets, pursuant to Rule 12b-1 under the 1940 Act.

No distribution or service fees are currently paid by the Fund and will not be paid by the Fund unless authorized by the Board. There are no current plans to impose these fees. In the event Rule 12b-1 fees were charged, over time they would increase the cost of an investment in the Fund.

## **DIVIDENDS, OTHER DISTRIBUTIONS AND TAXES**

Unlike interests in conventional mutual funds, which typically are bought and sold from and to the fund only at closing NAVs, the Fund’s Shares are traded throughout the day in the secondary market on a national securities exchange on an intra-day basis and are created and redeemed in-kind and/or for cash in Creation Units at each day’s next calculated NAV. In-kind arrangements are designed to protect ongoing shareholders from the adverse effects on the Fund’s portfolio that could arise from frequent cash redemption transactions. In a conventional mutual fund, redemptions can have an adverse tax impact on taxable shareholders if the mutual fund needs to sell portfolio securities to obtain cash to meet net fund redemptions. These sales may generate taxable gains for the ongoing shareholders of the mutual fund, whereas the Shares’ in-kind redemption mechanism generally will not lead to a tax event for the Fund or its ongoing shareholders.

Ordinarily, dividends from net investment income, if any, are declared and paid annually and semi-annually by the Goose Hollow Multi-Strategy Income ETF. The Fund distributes its net realized capital gains, if any, to shareholders annually.

Distributions in cash may be reinvested automatically in additional whole Shares only if the broker through whom you purchased Shares makes such option available.

### **Taxes**

As with any investment, you should consider how your investment in Shares will be taxed. The tax information in this Prospectus is provided as general information. You should consult your own tax professional about the tax consequences of an investment in Shares.

Unless your investment in Shares is made through a tax-exempt entity or tax-deferred retirement account, such as an individual retirement account, you need to be aware of the possible tax consequences when:

- The Fund makes distributions,
- You sell your Shares listed on the Exchange, and
- You purchase or redeem Creation Units.

### **Taxes on Distributions**

As stated above, dividends from net investment income, if any, ordinarily are declared

and paid semi-annually by the Fund. The Fund may also pay a special distribution at the end of a calendar year to comply with federal tax requirements. Distributions from the Fund's net investment income, including net short-term capital gains, if any, are taxable to you as ordinary income, except that the Fund's dividends attributable to its "qualified dividend income" (*i.e.*, dividends received on stock of most domestic and certain foreign corporations with respect to which the Fund satisfies certain holding period and other restrictions), if any, generally are subject to federal income tax for non-corporate shareholders who satisfy those restrictions with respect to their Fund shares at the rate for net capital gain -- a maximum of 15% for taxable years beginning before 2013. A part of the Fund's dividends also may be eligible for the dividends-received deduction allowed to corporations -- the eligible portion may not exceed the aggregate dividends the Fund receives from domestic corporations subject to federal income tax (excluding REITs) and excludes dividends from foreign corporations -- subject to similar restrictions. However, dividends a corporate shareholder deducts pursuant to that deduction are subject indirectly to the federal alternative minimum tax.

In general, your distributions are subject to federal income tax when they are paid, whether you take them in cash or reinvest them in the Fund (if that option is available). Distributions reinvested in additional Shares of the Fund through the means of a dividend reinvestment service, if available, will be taxable to shareholders acquiring the additional Shares to the same extent as if such distributions had been received in cash. Distributions of net long-term capital gains, if any, in excess of net short-term capital losses are taxable as long-term capital gains, regardless of how long you have held the Shares.

Distributions in excess of the Fund's current and accumulated earnings and profits are treated as a tax-free return of capital to the extent of your basis in the Shares and as capital gain thereafter. A distribution will reduce the Fund's NAV per Share and may be taxable to you as ordinary income or capital gain (as described above) even though, from an investment standpoint, the distribution may constitute a return of capital.

By law, the Fund are required to withhold 24% of your distributions and redemption proceeds if you have not provided the Fund with a correct Social Security number or other taxpayer identification number and in certain other situations.

### **Taxes on Exchange-Listed Share Sales**

Any capital gain or loss realized upon a sale of Shares is generally treated as long-term capital gain or loss if the Shares have been held for more than one year and as short-term capital gain or loss if the Shares have been held for one year or less. The ability to deduct capital losses from sales of Shares may be limited.

### **Taxes on Purchase and Redemption of Creation Units**

An Authorized Participant who exchanges securities for Creation Units generally will recognize a gain or a loss equal to the difference between the market value of the Creation Units at the time of the exchange and the sum of the exchanger's aggregate basis in the securities surrendered plus any Cash Component it pays. An Authorized Participant that exchanges Creation Units for securities will generally recognize a gain or loss equal to the difference between the exchanger's basis in the Creation Units and the sum of the aggregate market value of the securities received plus any cash equal to the difference between the NAV of the Shares being redeemed and the value of the

securities. The Internal Revenue Service (“Service”), however, may assert that a loss realized upon an exchange of securities for Creation Units cannot be deducted currently under the rules governing “wash sales” or for other reasons. Persons exchanging securities should consult their own tax advisor with respect to whether wash sale rules apply and when a loss might be deductible.

Any capital gain or loss realized upon redemption of Creation Units is generally treated as long-term capital gain or loss if the Shares have been held for more than one year and as short-term capital gain or loss if the Shares have been held for one year or less.

If you purchase or redeem Creation Units, you will be sent a confirmation statement showing how many Shares you purchased or sold and at what price. See “Tax Status” in the SAI for a description of the newly effective requirement regarding basis determination methods applicable to Share redemptions and the Fund’s obligation to report basis information to the Service.

The foregoing discussion summarizes some of the possible consequences under current federal tax law of an investment in the Fund. It is not a substitute for personal tax advice. Consult your personal tax advisor about the potential tax consequences of an investment in the Shares under all applicable tax laws. See “TAX STATUS” in the SAI for more information.

## **FUND SERVICE PROVIDERS**

Collaborative Fund Services, LLC serves as the administrator to the Trust (the “Administrator”), which has its principal office at 500 Damonte Ranch, Parkway Building 700, Unit 700, Reno, NV 89521.

Citi Fund Services Ohio, Inc. is the Fund’s sub-administrator and fund accountant. It has its principal office at 4400 Easton Commons, Suite 200, Columbus, OH 43219, and is primarily in the business of providing administrative, fund accounting and regulatory filing services to retail and institutional mutual funds.

Citibank N.A., is the Fund’s custodian. It has its principal office at 388 Greenwich Street, New York, NY 10048.

Paralel Distributors, LLC (the “Distributor”), located at 1700 Broadway Suite 1850, Denver, CO 80290, is the distributor for the shares of the Fund. The Distributor is a registered broker-dealer and member of the Financial Industry Regulatory Authority, Inc. (“FINRA”).

Thompson Hine LLP, 41 South High Street, Suite 1700, Columbus, OH 43215, serves as legal counsel to the Trust.

Cohen & Company, Ltd., located at 1835 Market Street, Suite 310, Philadelphia, PA 19103, serves as the Fund’s independent registered public accounting firm. The independent registered public accounting firm is responsible for auditing the annual financial statements of the Fund.

## **OTHER INFORMATION**

## **Continuous Offering**

The method by which Creation Units of Shares are created and traded may raise certain issues under applicable securities laws. Because new Creation Units of Shares are issued and sold by the Fund on an ongoing basis, a “distribution,” as such term is used in the Securities Act of 1933, as amended (the “Securities Act”), may occur at any point. Broker-dealers and other persons are cautioned that some activities on their part may, depending on the circumstances, result in their being deemed participants in a distribution in a manner which could render them statutory underwriters and subject them to the prospectus delivery requirement and liability provisions of the Securities Act.

For example, a broker-dealer firm or its client may be deemed a statutory underwriter if it takes Creation Units after placing an order with the Distributor, breaks them down into constituent Shares and sells the Shares directly to customers or if it chooses to couple the creation of a supply of new Shares with an active selling effort involving solicitation of secondary market demand for Shares. A determination of whether one is an underwriter for purposes of the Securities Act must take into account all the facts and circumstances pertaining to the activities of the broker-dealer or its client in the particular case, and the examples mentioned above should not be considered a complete description of all the activities that could lead to a characterization as an underwriter.

Broker-dealer firms should also note that dealers who are not “underwriters” but are effecting transactions in Shares, whether or not participating in the distribution of Shares, are generally required to deliver a prospectus. This is because the prospectus delivery exemption in Section 4(3) of the Securities Act is not available in respect of such transactions as a result of Section 24(d) of the 1940 Act. As a result, broker-dealer firms should note that dealers who are not “underwriters” but are participating in a distribution (as contrasted with engaging in ordinary secondary market transactions) and thus dealing with the Shares that are part of an overallotment within the meaning of Section 4(3)(C) of the Securities Act, will be unable to take advantage of the prospectus delivery exemption provided by Section 4(3) of the Securities Act. For delivery of prospectuses to exchange members, the prospectus delivery mechanism of Rule 153 under the Securities Act is only available with respect to transactions on a national exchange.

Dealers effecting transactions in the Shares, whether or not participating in this distribution, are generally required to deliver a Prospectus. This is in addition to any obligation of dealers to deliver a Prospectus when acting as underwriters.

## **FINANCIAL HIGHLIGHTS**

The financial highlights table is intended to help you understand the Fund's financial performance for the period of the Fund's operations. The total returns in the table represent the rate that an investor would have earned (or lost) on an investment in the Fund. The information for the Fund has been derived from the financial statements audited by Cohen & Company, Ltd, the Fund's independent registered public accounting firm, whose report, along with the Fund's financial statements, are included in the Fund's September 30, 2024 annual Form N-CSR, which is available upon request.

<b>Goose Hollow Multi-Strategy Income ETF</b>		<b>November 14, 2023<sup>(a)</sup> through September 30, 2024</b>
Net Asset Value, Beginning of Period		\$25.00
Net Investment Income (Loss) <sup>(b)</sup>		1.08
Net Realized and Unrealized Gains (Losses) on Investments <sup>(c)</sup>		1.17
Total from Investment Activities		2.25
Distributions from Net Investment Income		(0.53)
Distributions from Net Realized Gains on Investments		—
Total Distributions		(0.53)
Net Asset Value, End of Period		\$26.72
Net Assets at End of Period (000's)		\$18,033
Total Return at NAV(d)(e)		9.09%
Ratio of Net Expenses to Average Net Assets <sup>(f)(g)</sup>		1.00%
Ratio of Gross Expenses to Average Net Assets <sup>(f)(g)(h)</sup>		1.71%
Ratio of Net Investment Income (Loss) to Average Net Assets <sup>(f)(i)</sup>		4.72%
Portfolio Turnover <sup>(e)(j)</sup>		35%

(a) Commencement of operations.

(b) Calculated using the average shares method.

(c) Realized and unrealized gains per share are balancing amounts necessary to reconcile the change in net asset value per share for the period, and may not accord with the aggregate gains and losses in the Statement of Operations due to share transactions for the period.

(d) Net asset value total return is calculated assuming an initial investment made at the net asset value at the beginning of the period, reinvestment of all dividends and distributions at net asset value during the period, if any, and redemption on the last day of the period at net asset value. This percentage is not an indication of the performance of a shareholder's investment in the Fund based on market value due to differences between the market price of the shares and the net asset value per share of the Fund.

(e) Not annualized for periods less than one year.

(f) Annualized for periods less than one year.

(g) Excludes expenses of the investment companies in which the Fund invests.

(h) If applicable, certain fees were waived and/or reimbursed. If such waivers/reimbursements had not occurred, the ratio would have been as indicated.

(i) Recognition of net investment income by the Fund is affected by the timing of the declaration of dividends by the underlying investment companies in which the Fund invests. The ratio does not include net investment income of the underlying investment companies.

(j) Excludes the impact of in-kind transactions.

## PRIVACY NOTICE

### Collaborative Investment Series Trust

Rev. November 2017

FACTS	WHAT DOES COLLABORATIVE INVESTMENT SERIES TRUST DO WITH YOUR PERSONAL INFORMATION?
-------	--

Why?	Financial companies choose how they share your personal information. Federal law gives consumers the right to limit some, but not all sharing. Federal law also requires us to tell you how we collect, share, and protect your personal information. Please read this notice carefully to understand what we do.
------	---

What?	<p>The types of personal information we collect and share depends on the product or service that you have with us. This information can include:</p> <ul style="list-style-type: none"><li>• Social Security number and wire transfer instructions</li><li>• account transactions and transaction history</li><li>• investment experience and purchase history</li></ul> <p>When you are <i>no longer</i> our customer, we continue to share your information as described in this notice.</p>
-------	--

How?	All financial companies need to share customers' personal information to run their everyday business. In the section below, we list the reasons financial companies can share their customers' personal information; the reasons Collaborative Investment Series Trust chooses to share; and whether you can limit this sharing.
------	--

Reasons we can share your personal information:	Does Collaborative Investment Series Trust share information?	Can you limit this sharing?
<b>For our everyday business purposes</b> - such as to process your transactions, maintain your account(s), respond to court orders and legal investigations, or report to credit bureaus.	YES	NO
<b>For our marketing purposes</b> - to offer our products and services to you.	NO	We don't share
<b>For joint marketing with other financial companies.</b>	NO	We don't share
<b>For our affiliates' everyday business purposes</b> - information about your transactions and records.	NO	We don't share
<b>For our affiliates' everyday business purposes</b> - information about your credit worthiness.	NO	We don't share
<b>For nonaffiliates to market to you</b>	NO	We don't share

Additional information about the Fund, including the Fund's policies and procedures with respect to disclosure of the Fund's portfolio holdings, is included in the Fund's SAI. The SAI is incorporated into this Prospectus by reference (i.e., legally made a part of this Prospectus). The SAI provides more details about the Fund's policies and management. Additional information about the Fund's investments will also be available in the Fund's annual and semi-annual reports to shareholders and Form N-CSR. In the Fund's annual report, you will find a discussion of the market conditions and investment strategies that significantly affected the Fund's performance during its last fiscal year. In Form N-CSR, you will find the Fund's annual and semi-annual financial statements.

To obtain a free copy of the SAI, the annual and semi-annual reports to shareholders, Form N-CSR or other information about the Fund, or to make shareholder inquiries about the Fund, please call (866) 898-6447.

Reports and other information about the Fund are available on the EDGAR Database on the SEC's Internet site at <http://www.sec.gov>. Copies of the information may be obtained, after paying a duplicating fee, by electronic request at the following E-mail address: [publicinfo@sec.gov](mailto:publicinfo@sec.gov).
